S106 Funding Ideas

Install a splash pad

I think that the parish would benefit from the new style of outdoor fitness that is being installed around the Country that is being used by all ages, there are some excellent examples of this one is at the Abbey Pools. Kompan installed this and I know that you are already in contact with them regarding the play area. Here is the website link to it https://www.kompan.co.uk/activating-the-inactive

Cucumber Funding Ideas

It would be good to get the Waterbeach sign on Denny End fixed and replaced as the one there now is broken and looks depressing!

Also, it would be good to have all the trees trimmed in the village as a number of the cover the paths or are hanging too low, especially corner of Denny End Road/Bannold Road and Bannold road/Way Lane .

In addition, Denny End Road towards the traffic lights is a litter hotspot. Just the other day i removed 3 bin bags of litter in 3 weeks...also there was a pile of diet coke and coffee cups chucked next to the bus stops (both sides) so something needs to be done to help prevent that happening. After clearing up I've already noticed another cup has been chucked on the floor! Not sure if putting a bin would help or more notices up to help stop littering!?

In addition to the above, more litter picking equipment for the Waterbeach wombles would be great!

xx

I helped set up the Waterbeach Wombles initiative earlier this year and we now have over 80 Wombles willing to help keep Waterbeach clean.

We've had a few litter pickers donated to us and SCDC also provided us with 15 which we have distributed to willing Wombles. However, we're always in need of more litter pickers and we especially need bag hoops which make the task a lot easier.

Hopefully you're able to set aside a small amount from this budget to go towards the equipment we need.

I've noticed that a few bins around the village have open tops which can sometimes add to the litter as rubbish blows out, can this money be used to get new bins with tops on?
