

Waterbeach Parish Council

Recreation Users Group Update

1. **Chittering Play Park** - Three quotations have been received to undertake works needed at Chittering playpark. The amounts totalling between £ 35 000 - £ 42 000. The recreation User's Group met to discuss the works needed and would like to propose that the more urgent works be carried out first. These are:
 - The gate be replaced,
 - The current surfacing be removed along with the climbing structure that is currently a health and safety risk
 - Installing new grounding throughout
 - Installing a picnic bench
 - Replacing the swings seats and chains on the current swing structure
 - Re-installing the ride on toyThe suggested budget for these renovations is set at £20 000. The group further recommend that once more money becomes available in the budget, the project can be expanded upon, as S106 funding is not a funding option for this project.

2. **Section 106 Funding Available – Spending Suggestions:**
 - To **note** the groundsman will provide a list of grounds equipment and include a cost analysis for each item. This list will be taken to Council and the REC Users Group would then like to recommend to Council that an amount be allocated to servicing of or purchasing of grounds equipment. The initial figure is suggested at £10 000.00 per year, which will be revisited after the cost analysis.
 - To **agree** the replacement of the Supernova situated in the children's play area which has become a health and safety risk and has been condemned. The RUG recommend that works are carried out urgently. It is recommended that we replace the item.
 - To **receive an update** on the site visit to both the toddler play area and the Sports Pavilion from the Recreation Users Group.
