

District Councillors report December 2015

Station car park

Network Rail have said that their business case doesn't work for the car park so they may be prepared to sell the land, I have approached the County Council and they have said they have no money to buy it, I have asked Network Rail how much they expect this land to be worth but no answer yet.

Speedwatch

Volunteers have been busy with their own lives so Speedwatch has not been operational this month.

Primrose Lane

I am still waiting for a start date for this project but being realistic I would not anticipate anything before Christmas.

Gully drains

The drain on the corner of Car Dyke Road and Cambridge Road has been jetted out but it flows into the ditch at the back of the verge and that is partially blocked, so the Flood management team from the County Council are going to contact the adjacent land owner and ask them to clear their section.

Footway repairs

The entrance to No's 7 & 8 Pieces Lane was crumbling away creating a trip hazard, initially SCDC said it was theirs then changed their mind, County Council had a look but decided it wasn't theirs so after a lot of badgering SCDC did decide to do it and work out who was going to pay afterwards.

Local Plan

On Monday evening 30th November I will be attending a meeting at South Cambs where amendments to the Councils submission will be discussed, I think that it will still be voted through despite the many objections raised by certain villages.
